

# Style Edge Project Framework

**Project Name :** *Style Edge* for Manufacture and sale of clothing

## **Cycle Of Project :**

At Style Edge: we manage the entire journey of fashion, from sourcing high-quality fabrics to delivering stylish garments to our customers.

Our process starts with purchasing the finest raw materials, including fabrics and accessories, from trusted suppliers. Once the materials arrive, they are carefully stored and tracked in our inventory system, ensuring we always have what we need for production.

Next comes manufacturing, where our skilled team transforms raw fabrics into finished clothing . Once ready, the garments move back to our warehouse, prepared for distribution.

Our sales channels are diverse. Through wholesale, we supply bulk orders to retailers, while our POS system handles direct sales in our stores, ensuring a seamless shopping experience. Every sale, whether large or small, is linked to our accounting system, keeping track of revenues, expenses, and financial reports.

Behind the scenes, our HR team manages employees, tracks attendance, and processes payroll, ensuring smooth operations across all departments.

At Style Edge, we bring fashion to life through an efficient, technology-driven cycle, powered by Odoo

### **Odoo Used Modules:**

#### **1-Purchase :**

Buy fabrics and accessories, receive stock, and record supplier invoices.

#### **2-Inventory :**

Store raw materials, track stock levels, and manage warehouses.

#### **3-Manufacturing :**

Use fabrics to produce clothing items and move finished goods to inventory.
